

Long Bio (approximately 250 words)

Adam Axler spent more than twenty years in emergency medicine, beginning as a firefighter/medic in Ohio before working as a Manhattan paramedic, including service at Ground Zero on September 11, and later as a physician assistant in emergency departments and urgent care centers throughout South Florida.

Throughout his career, he witnessed the evolution of American healthcare from the inside, caring for patients through national tragedies, natural disasters, the opioid epidemic, and the changing relationship between medicine and public trust. Those experiences became the foundation for his debut memoir, *American Triage: From 9/11 to Fahrenheit 451*. Described as *Kitchen Confidential* meets *The Pitt*, the memoir offers a sarcastic, tough-love front-row view of the decline of Western medicine, balanced by moments of connection, humor, and compassion.

Today, Adam owns Collectible Science Fiction, an online bookstore specializing in collectible science fiction, fantasy, and horror, including vintage and rare hardcovers and paperbacks. A lifelong reader and collector, he now spends his days surrounded by books instead of hospital corridors.

Adam lives in South Florida with his wife, Lori. Together they are proud parents of two daughters, Sammi and Syd.
